

# Electrical Safety Systems

## ENVIRONMENTAL & SUSTAINABILITY POLICY STATEMENT

We at Electrical Safety Systems Ltd recognise our duties under the Health and Safety at Work etc Act 1974 and the accompanying protective legislation. We will endeavour to meet the requirements of this legislation so as to ensure that we maintain a safe and healthy working environment. The Directors of Electrical Safety Systems Ltd are committed to minimising the impact of its operations on the environment by means of a programme of continuous improvement. Our support for a conscientious approach to environmental matters also requires that our associate companies make positive contributions to the environment.

### Electrical Safety Systems Ltd is committed to:-

- Requiring that all our associated companies and suppliers identify any harmful processes and materials they currently use and as far as reasonably practicable that we secure their commitment to a phased elimination.
- Purchasing items that can be operated in an energy efficient manner.
- Selecting suppliers who are committed to sustainable environmental improvements.
- Purchasing goods and services which can be used in an environmentally responsible way, and ensuring that surplus materials are disposed of in a way that has minimal impact on the environment.
- Purchasing items where possible that can be reused or recycled.
- Meeting environmental standards required by current legislation.

In order that we can achieve our objectives we will ensure our employees are informed of their obligations and ensure they co-operate with management and adhere with the provisions of the Electrical Safety Systems Ltd Environmental & Sustainability Policy.
